DEEPAK PRASAD

Senior Product Manager | Subscription Growth, Monetization & Applied AI

Bengaluru, India • +91 8792964656 • shipwithdeepak@gmail.com • linkedin.com/in/prasad-deepak • deepak-prasad.ai.studio

PROFILE

Senior Product Manager with 7+ years across consumer subscriptions, AI features, payments and marketplaces. Founding member of the Sportstech product team and its first PM: took a free app to **~15K paying subscribers in under 3 years** and a **€900K+ annual revenue run-rate (est.)**, up from €659K in FY2025. Shipped the in-app **AI coach** (about 4,500 peak DAU) and redesigned onboarding and cancellation across the subscriber lifecycle. Promoted to Senior PM; led a 7-person team plus interns. Earlier, rebuilt ReshaMandi payouts from up to 15 days to seconds for standard payouts.

WORK EXPERIENCE

Senior Product Manager | Sportstech (via Tejmonvi Softwares) **Oct 2024 – Sep 2026**

Bengaluru | German connected-fitness app | 250K+ downloads (est.), 200K+ users, ~15K paying | ODC model

- Grew a free app into a subscription business: **~15K paying subscribers in under 3 years**, with annual revenue up from **€659K in FY2025** to a **€900K+ run-rate (est.)**, across 200K+ users.
- Shipped an in-app **AI coach** to a peak of **~4,500 DAU** after its Nov 2025 launch: consent and safety limits, a fallback for high-risk cases, Gemini with a ChatGPT fallback, and a 100-user beta first.
- **Workout completion rose 30%+** after I led AI video recommendations end to end with the data and ML team, from requirements to launch.
- Found that **monthly subscribers churned far faster**, rebuilt onboarding around the first **"aha" moment**, won the **cancellation A/B tests** with a discounted yearly offer and took yearly plans to **87% of paying subscribers**.
- Spotted a churn cliff (~4,000 free-plan device owners with no card on file) and built the fix myself: a **Lovable and Stripe redemption site** that moved about **2,000 (~50%)** onto paid, auto-renewing plans at ~3–5% fees.
- Shipped **300+ workout videos** in Italian, French and Spanish in ~3 weeks, about 10× faster than studio production, with an AI dubbing pipeline and human review.
- Designed a single fitness dashboard that brings workout metrics from iOS, Android, display and Smart Gym into one view, and defined the **Performance Score** to rate each workout.
- Led the India product team, reporting to the CEO of the India unit: set the roadmap against company OKRs and hired, coached and managed **5 direct reports** (3 PMs, growth, content), 2 designers and interns.

Product Manager | Sportstech (via Tejmonvi Softwares) **Aug 2023 – Sep 2024**

- First PM: took the app from free to paid, designing signup, onboarding, trial, paywall and checkout, and defined conversion and retention metrics from scratch.
- Owned subscription billing on Google Play, the App Store and Stripe, from sandbox testing to launch.

Product Manager | ReshaMandi **Jun 2021 – Aug 2023**

Bengaluru | Agri-to-fashion silk marketplace | ₹2,000 Cr platform | 80,000+ farmers

- Rebuilt farmer payouts on Razorpay: **up to 15 days to seconds** for standard payouts and under 2 hours for large ones, at 99.9% success, as disbursements grew from ₹10–15 Cr to ₹20–25 Cr a month.
- Built a live bidding app for cocoon buyers (scan, bid, watch, win, pay), adding geofencing and a 15-minute payment window after remote bids led to non-payment.
- Digitised vendor onboarding, KYC, orders and logistics across LeadSquared, SAP and Camunda; partnered with the ML team on image-based price recommendations with a human in the loop.

Associate Product Manager | LionCircuits **Jul 2018 – May 2020**

- Led concept-to-launch of a B2B assembly ordering platform (+40% monthly orders); built an auto-quote and BOM-scrubbing tool.

PROJECTS

AI Portfolio Copilot | Personal project

- Built a RAG copilot over my own work (Gemini API), evaluated on a 20-question golden set (19/20), with a voice mode in Indian languages via Sarvam AI.

SKILLS & TOOLS

Product: Subscription growth, pricing and packaging, churn and retention, payments and billing, funnel analytics, experimentation, roadmap and KPIs, PRDs

Tools & AI: SQL, Amplitude, Firebase, Power BI, Stripe, Unzer, Google Pay, Apple Pay, Klarna, PayPal, SEPA, Razorpay, Jira, Figma, Claude Code, Lovable, Gemini API, Python (prototyping)

EDUCATION

Bachelor of Engineering (B.E.) | Visvesvaraya Technological University (VTU) **2018**
