

DEEPAK P

Senior Product Manager | B2B & B2C | AI | Product Strategy & Roadmapping

Bengaluru, India • +91 8792964656 • shipwithdeepak@gmail.com • [linkedin.com/in/prasad-deepak](https://www.linkedin.com/in/prasad-deepak)

PROFILE

Senior Product Manager with 7+ years building and scaling B2B and B2C products across SaaS, AI, marketplaces, workflow automation and connected products, including a production conversational AI feature and an ML-powered pricing model, alongside enterprise workflow automation across CRM, ERP and payments systems. Skilled at reading market trends and customer pain points and turning them into scalable product solutions, owning quarterly planning and roadmap creation through customer interviews, UAT, launch and adoption tracking. Known for taking 0 → 1 products from ambiguous charters, managing and mentoring product teams, and bringing automation to complex, non-desk operational workflows.

WORK EXPERIENCE

Product Consultant | Independent (via Tejmonvi Softwares)

May 2026 – Present

Bengaluru, India | Advising early-stage ventures across healthtech, fintech, and consumer platforms

- Lead product strategy for **TNSQAI**, a pre-commercial AI-powered radiology diagnostics company. Benchmarked 7 global radiology AI players and defined a Now/Next/Later product roadmap, translating **AI model evaluation** outputs from the ML team into go-to-market decisions.
- Advise early-stage founders in parallel across an **M&A marketplace platform** and a **global music-rights platform**, translating ambiguous priorities into structured requirements and execution roadmaps.

Senior Product Manager | Sportstech

Oct 2024 – May 2026

Bengaluru, India | Digital sports subscription platform (iOS & Android), via Tejmonvi Softwares (ODC) | 174,000+ users

- Owned end-to-end **subscription strategy** for a B2C SaaS platform serving **174,180 freemium users** and **12,401 paying subscribers**, generating **€659K in FY2025 subscription revenue**. Subscribers grew **81.9% YoY**, with yearly-plan retention reaching **96.8%** (monthly plans saw comparatively higher churn).
- Led the **0 → 1 development of an in-app AI Coach**, defining conversational AI use cases, user flows, context and data requirements, and quality guardrails. Launched on **Gemini** as the primary model with **ChatGPT as fallback**, and scaled adoption from **~300 to ~2,000 DAU within roughly 3 months** through iterative improvements.
- Owned **quarterly planning and roadmap creation** for the subscription domain, defining pricing, free/paid packaging, trial design, paywalls and renewal experiences, and establishing product metrics across conversion, churn, retention and LTV.
- Owned product-performance tracking across **engagement, subscription and acquisition funnels** using DAU/MAU, conversion, retention and churn metrics to inform roadmap prioritisation and post-launch iteration. Product reached **3,033 DAU and 27,001 MAU (an 11% DAU/MAU ratio)**.
- Designed an **AI-assisted content-localisation workflow** that shipped **200+ videos in roughly 3 weeks (about 10× faster** than the prior process), supporting launches in Italian, French and Spanish.
- Operated in an **ODC model**, leading the India-based product and engineering team while sales and operations sat at company HQ in Germany. **Directly managed and mentored** a 6-person cross-functional pod (3 PMs, Growth, Content), growing their scope and ownership while setting OKRs and reporting KPIs to leadership.

Product Manager | Sportstech

Aug 2023 – Sep 2024

Bengaluru, India

- Joined as the **first Product Manager** on the team and built the platform **0 → 1** from scratch, designing signup, onboarding and subscription flows (pricing, packaging, trial, paywall, checkout) with no prior playbook and defining retention and conversion metrics from first principles.
- Conducted **customer interviews** and synthesised feedback, app reviews and behavioural data to prioritise fixes. Translated requirements into **PRDs, user stories and acceptance criteria**, partnering with engineering and design through discovery, UAT, launch and post-launch iteration.

Product Manager | ReshaMandi

Jun 2021 – Sep 2023

Bengaluru, India | Enterprise B2B agri-tech & silk marketplace | ₹2,000 Cr platform | ~1.1 Lakh stakeholders across 5 business verticals (incl. 80K+ farmers via ReshaFarms)

- Owned product delivery across a complex **B2B marketplace ecosystem** spanning farmers, buyers, field operations, sales, finance and customer support, translating fragmented offline workflows into scalable digital products.
- Digitised end-to-end workflows across onboarding, KYC, lead generation, purchase and sales orders, logistics and payments, integrating **LeadSquared CRM, Razorpay, SAP and Camunda** across business, IT and vendor teams. Identified payment delays

as a trust and operational bottleneck and owned an **instant-payout workflow** that automated approval-to-bank settlement, as disbursement volume grew from roughly **₹10–15Cr to ₹20–25Cr per month**.

- Conducted **direct field research** with farmers, agents and operations teams, regularly travelling to collection centres and grounding roadmap and design decisions in direct observation and user feedback rather than assumptions.
- Built a **real-time cocoon bidding workflow 0 → 1**, replacing manual buyer discovery and negotiation with a structured Scan → Bid → Watch → Win → Pay experience and configurable auction rules. The pilot ran roughly **3 sessions a day** and lifted transaction value **more than 35%** versus the prior baseline.
- Partnered with the **ML team** to define an image-based cocoon pricing solution, translating field-level pricing and quality-assessment challenges into an AI-assisted product workflow (**>90% model accuracy**).

Associate Product Manager | LionCircuits

Jul 2018 – May 2020

Bengaluru, India | IoT, AI & PCB manufacturing platform

- Led **concept-to-launch** of a B2B Assembly Ordering Platform, contributing to a **40% increase** in monthly orders. Built an auto-quote generation and BOM-scrubbing tool, plus a Raspberry Pi-based AI proof-of-concept for facial-recognition traffic monitoring.

CORE COMPETENCIES

Product Strategy: Product Strategy, Market & Customer Research, Customer Interviews, Quarterly Planning, Roadmapping, Prioritisation, 0 → 1 Product Development, PRDs, User Stories, UAT, Adoption Tracking

B2B SaaS / B2C: B2B SaaS Platforms, B2C Subscription Products, Enterprise Workflow Automation, Marketplace Products, Payments, Monetisation

AI / Data: AI Product Strategy, Conversational AI, AI-Enabled Workflows, ML Product Development, Product Analytics, Funnel Analysis, Retention, Churn, LTV

Leadership: Cross-functional Leadership (Eng, Design, Sales, CS), People Management & Mentoring, Stakeholder Management, OKRs, Influence Without Authority, Agile/Scrum

SKILLS & TOOLS

Tools & Platforms: Jira, SAP (basic), Camunda, LeadSquared CRM, Razorpay, Figma, Firebase, Google Analytics, Google Play Console

Domains: Consumer Subscription, Enterprise B2B, Fintech (Lending/BNPL), Healthtech/AI, Agri-Tech/Field Ops, IoT/Hardware

EDUCATION

Bachelor of Engineering (B.E.) | Visvesvaraya Technological University (VTU) | 2018
