## Senior Product Manager | AI | 0 → 1 Product Strategy | B2B & B2C Marketplaces & SaaS

Bengaluru, India • +91 8792964656 • shipwithdeepak@gmail.com • [linkedin.com/in/prasad-deepak](https://www.linkedin.com/in/prasad-deepak) • [deepak-prasad.ai.studio](https://deepak-prasad.ai.studio)

### PROFILE

Senior Product Manager with 7+ years building 0 → 1 products across B2B and B2C marketplaces, SaaS, and AI-enabled platforms, from a B2B-to-B2C agri-to-fashion marketplace spanning vendor sourcing and trust to consumer product discovery, to a subscription platform's activation and retention funnel. Skilled at diagnosing funnel and behavioural problems through direct field research and data before reaching for features, and at building trust-driven transactional journeys, pricing mechanics, and repeat-usage systems in resource-constrained, cross-functional environments. AI-native across research, prototyping, and execution, having shipped a production conversational AI feature and an ML-based pricing model.

### WORK EXPERIENCE

#### Product Consultant | Independent (via Tejmonvi Softwares)

May 2026 – Jul 2026

Bengaluru, India | Advising early-stage ventures across healthtech, fintech, and consumer platforms

- Advised early-stage ventures on product strategy: led AI model evaluation and roadmap definition for **TNSQAI** (AI-powered radiology diagnostics, benchmarked against 7 global players), alongside an **M&A marketplace platform** and a **global music-rights platform**, translating ambiguous founder priorities into structured requirements and execution roadmaps.

#### Senior Product Manager | Sportstech

Oct 2024 – May 2026

Bengaluru, India | Digital sports subscription platform (iOS & Android), via Tejmonvi Softwares (ODC) | 174,000+ users

- Owned the end-to-end **activation and retention funnel** for a B2C subscription platform spanning **174,180 freemium users** and **12,401 paying subscribers** (generating **€659K in FY2025 revenue**). Diagnosed a hidden churn gap by segmenting retention by plan type, monthly plans churned meaningfully faster than yearly, and used that insight to redesign pricing and renewal, growing subscribers **81.9% YoY**.
- Led the **0 → 1 development of an in-app AI Coach**, defining conversational AI use cases, user flows, and quality guardrails, including fallback handling for low-confidence outputs (Gemini primary, ChatGPT fallback).
- Validated the AI Coach through a **phased beta with 100 users** before full release, then ran an **A/B test comparing voice input against text-only interaction** to learn what users actually wanted rather than assume it, scaling adoption from ~300 to ~2,000 DAU within roughly 3 months.
- Owned **quarterly planning and roadmap creation** for the subscription domain, defining pricing, packaging, trial design and renewal experiences, and measuring impact through conversion, churn, retention and LTV rather than surface-level engagement metrics.
- Designed an **AI-assisted content-localisation workflow** that shipped **200+ videos in roughly 3 weeks (about 10× faster** than the prior process), supporting launches in Italian, French and Spanish.
- Operated in an **ODC model**, leading the India-based product and engineering team while sales and operations sat at company HQ in Germany. **Directly managed and mentored** a 6-person cross-functional pod (3 PMs, Growth, Content), coordinating priorities across functions without a shared reporting line to Germany.

#### Product Manager | Sportstech

Aug 2023 – Sep 2024

Bengaluru, India

- Joined as the **first Product Manager** on the team and built the platform **0 → 1** from scratch, designing signup, onboarding and subscription flows (pricing, packaging, trial, paywall, checkout) with no prior playbook and defining retention and conversion metrics from first principles.
- Conducted **customer interviews** and synthesised feedback, app reviews and behavioural data to prioritise fixes. Translated requirements into **PRDs, user stories and acceptance criteria**, partnering with engineering and design through discovery, UAT, launch and post-launch iteration.

#### Product Manager | ReshaMandi

Jun 2021 – Sep 2023

Bengaluru, India | Enterprise B2B/B2C marketplace spanning the agri-to-fashion silk value chain | ₹2,000 Cr platform | ~1.1 Lakh stakeholders across 5 business verticals (incl. 80K+ farmers via ReshaFarms)

- Owned product delivery across a complex **B2B marketplace ecosystem** spanning farmers, buyers, field operations, sales, finance and customer support, an ambiguous problem spanning **pricing, trust, fulfilment and user behaviour**, translating fragmented offline workflows into scalable digital products.
- Digitised end-to-end workflows across vendor onboarding, KYC, lead generation, purchase and sales orders, logistics and payments, integrating **LeadSquared CRM, Razorpay, SAP and Camunda** across business, IT and vendor teams. Identified

payment delays as a **trust** and operational bottleneck for offline-first users and owned an **instant-payout workflow** that automated approval-to-bank settlement, as disbursement volume grew from roughly **₹10–15Cr to ₹20–25Cr per month**.

- Diagnosed marketplace friction through **direct field research** with farmers, agents and operations teams rather than starting from predetermined features, regularly travelling to collection centres at dawn and grounding roadmap decisions in direct observation and user feedback.
- Built a **real-time cocoon bidding workflow 0 → 1**, replacing manual buyer discovery and negotiation with a structured Scan → Bid → Watch → Win → Pay experience that drove repeat participation and lifted transaction value **more than 35%** versus the prior baseline.
- Extended ownership across the full agri-to-fashion value chain, from **vendor KYC and yarn bidding** on the B2B sourcing side to **saree product listings and discovery** for end consumers, giving me direct experience on both sides of the same marketplace: supplier-facing sourcing and buyer-facing product discovery.
- Partnered with the **ML team** to define an image-based cocoon pricing solution, translating field-level pricing and quality-assessment challenges into an AI-assisted product workflow (**>90% model accuracy**) that strengthened buyer-seller trust in price fairness.

## Associate Product Manager | LionCircuits

Jul 2018 – May 2020

Bengaluru, India | IoT, AI & PCB manufacturing platform

- Led **concept-to-launch** of a B2B Assembly Ordering Platform, contributing to a **40% increase** in monthly orders. Built an auto-quote generation and BOM-scrubbing tool, plus a Raspberry Pi-based AI proof-of-concept for facial-recognition traffic monitoring.

## CORE COMPETENCIES

---

**Product Strategy:** Product Strategy, Market & Customer Research, Field Research, Quarterly Planning, Roadmapping, Prioritisation, 0 → 1 Product Development, PRDs, UAT, Adoption Tracking

**Marketplace, SaaS & Commerce:** B2B & B2C Marketplaces, Transactional Funnels, Subscription/SaaS Products, Trust & Activation, Pricing & Assortment Mechanics, Fulfilment Coordination, Retention Systems

**AI / Data:** AI-Native Execution, Conversational AI, ML Product Development, A/B Testing & Experimentation, Product Analytics, Funnel Analysis, Retention, Churn, LTV

**Leadership:** Cross-functional Leadership (Eng, Design, Growth, Ops), People Management & Mentoring, Stakeholder Management, OKRs, Resource-Constrained Execution

## SKILLS & TOOLS

---

**Tools & Platforms:** Jira, SAP (basic), Camunda, LeadSquared CRM, Razorpay, Figma, Firebase, Google Analytics, Google Play Console

**Domains:** B2B Marketplaces, Consumer Subscription, Fintech (Payments/Lending), Agri-Tech/Field Ops, Healthtech/AI, IoT/Hardware

## EDUCATION

---

Bachelor of Engineering (B.E.) | Visvesvaraya Technological University (VTU) | 2018
