# DEEPAK PRASAD

**Senior Product Manager | Subscription Growth, Payments & AI Products**

Bengaluru, India • +91 8792964656 • shipwithdeepak@gmail.com • linkedin.com/in/prasad-deepak • deepak-prasad.ai.studio

## PROFILE

Senior Product Manager with 7+ years in consumer subscriptions, payments and marketplaces. At Sportstech, a German connected-fitness brand, I took a free app to a paid subscription business for European users, owning acquisition, trials, renewals and churn, with billing across the App Store, Google Play and Stripe: **12,401 paying subscribers** by May 2026 (**+81.9% YoY**) and **€659K revenue** in FY2025. I worked daily with HQ in Germany and led a team of 5. Earlier, I rebuilt payouts on Razorpay for 80,000+ farmers at ReshaMandi.

## CORE COMPETENCIES

Subscription Growth • Churn & Retention • Pricing & Packaging • Payments & Billing • Funnel Analytics • Lifecycle & CRM Flows • Roadmap & KPIs • Field & Customer Research • Team Leadership

## WORK EXPERIENCE

**Senior Product Manager | Sportstech** **Oct 2024 – Sep 2026**

*Bengaluru | Connected-fitness subscription app (iOS, Android) for a German brand, via Tejmonvi Softwares (ODC)*

- Owned the subscription business end to end (pricing, trials, renewals, churn): a free app to **12,401 paying subscribers** and 174,180 freemium users by May 2026 (+81.9% YoY); **€659K** FY2025 revenue, ~€740K annualised in 2026 (est.).
- Defined the subscription KPIs with the growth manager and launched a daily report for the CEO, directors and VPs (subscribers, churn, funnel, engagement, downloads).
- Analysed 12-month retention by plan type with the growth manager (**annual 98% vs monthly 27%**) and made monthly-to-annual migration the 2026 priority, backed by seasonal offers (Black Week, Christmas, New Year).
- Owned renewal and churn recovery across App Store, Google Play and Stripe: renewal reminders, win-back offers and failed-payment recovery.
- Found a churn cliff: ~4k device owners on free one-year plans had no card on file. Built a Lovable AI website with Stripe as the payment gateway and retained ~2k (~50%); also a long-term route to cut App Store and Google Play fees.
- Launched the app in three new languages with an AI dubbing pipeline: 200+ workout videos in Italian, French and Spanish in ~3 weeks, about 10× faster than studio production; more users started workouts in their own language.
- Shaped a broad request to add AI into an in-app **AI coach**: set the safety limits, chose Gemini with a ChatGPT fallback on cost and quality, ran a 100-user beta, and grew it from ~300 to ~4,500 peak DAU.
- Led the India product and engineering team for HQ in Germany, aligning roadmap and KPIs with sales and operations **across time zones**; **hired and managed 5 direct reports** (3 PMs, growth, content) and directed 2 designers.

**Product Manager | Sportstech** **Aug 2023 – Sep 2024**

*Bengaluru, India*

- Joined as the **first PM** and took the app from free to paid: designed signup, onboarding, trial, paywall and checkout, and defined conversion and retention metrics from scratch.
- Owned subscription billing on Google Play, the App Store and Stripe, from sandbox testing to launch.
- Turned customer interviews, app reviews and usage data into PRDs and priorities, protecting trust with existing hardware owners while introducing paid plans.

**Product Manager | ReshaMandi** **Jun 2021 – Aug 2023**

*Bengaluru, India | Agri-to-fashion silk marketplace | ₹2,000 Cr platform | 80,000+ farmers*

- Rebuilt farmer payouts on Razorpay: settlement fell from up to 15 days to **under 2 hours** at 99.9% success while monthly disbursements grew from ₹10–15 Cr to ₹20–25 Cr.
- Built a **live bidding app** for cocoon buyers (scan, bid, watch, win, pay), adding geofencing and a 15-minute payment window after remote bids led to non-payment.
- Digitised vendor onboarding, KYC, orders and logistics, integrating **LeadSquared CRM, SAP and Camunda**; grounded decisions in field research at collection centres.
- Partnered with the ML team on image-based price recommendations for cocoons, with a human in the loop.

**Associate Product Manager | LionCircuits** **Jul 2018 – May 2020**

*Bengaluru, India | IoT and PCB manufacturing platform*

- Led concept-to-launch of a B2B assembly ordering platform, contributing to a **40% increase in monthly orders**; built an auto-quote and BOM-scrubbing tool.

## PROJECTS

**AI Portfolio Copilot | deepak-prasad.ai.studio** **Personal project**

- Built a RAG copilot over my own work (Gemini API), evaluated with a **20-question golden set (19/20)**, with a voice mode in Indian languages via Sarvam AI on Cloudflare Workers.

## SKILLS & TOOLS

**Product:** Subscription growth, churn and retention, pricing and packaging, global payments and billing, funnel analytics, A/B testing and experimentation, localisation, roadmap and KPIs, PRDs

**Tools:** SQL, Amplitude, Firebase, Google Analytics, Power BI, Stripe, Google Play Console, Razorpay, Jira, Wrike, Figma

**AI & building:** Claude Code, Lovable, Gemini API, Sarvam AI, Cloudflare Workers, n8n, Python (prototyping)

**Languages:** English, Kannada, Telugu, Hindi (basic)

## EDUCATION

**Bachelor of Engineering (B.E.)** | Visvesvaraya Technological University (VTU) **2018**
